WHAT'S IN THE NAGA?

Naga, WorldFish Center Quarterly, publishes information on all aspects of fisheries and other living aquatic resources, including research on project summaries, news, notices of new publications and upcoming workshops, conferences, symposia, summary reports of meetings and news of personnel.

Articles appearing in the quarterly may be quoted. We would appreciate a reference made to the source and receipt of a copy of any reprinted material.

WHY NAGA?

The Naga is an underwater creature from Asian mythology. Superior to humans, it inhabits sub-aquatic paradises, living at the bottom of rivers, lakes and seas in resplendent palaces studded with gems and pearls. It is the keeper of the life-energy that is stored in the waters of springs, wells and ponds. It is also the guardian of the riches of the seas – corals, shells and pearls. Naga represents the very focus of WorldFish Center, namely protecting the wealth and productivity of tropical waters.

WHO GETS THE NAGA?

The quarterly is distributed free* of charge to institutions associated with fisheries and aquaculture in developing countries. For those who would like to subscribe, the fee is US\$20 per annum. To include your institution in our free mailing list or to subscribe, contact us at naga@cgiar.org or NAGA, Communications Unit, WorldFish Center.

Payment should be made to ICLARM in US dollars by bankdraft or check from a US-based bank.

You are invited to contribute:

The editor invites articles and reviews, but reserves the right to accept or reject papers and to shorten them to meet space requirements. Authors may order at cost reprints of articles published. Opinions expressed in a signed article are those of the author/s and not necessarily those of the management of WorldFish Center. *Naga* comes out in January, April, July and October of each year. Articles may be submitted at any time during the year. Once they are reviewed and accepted, it will take three months to publish them.
