## About this document

These brand guidelines explain how to apply visual and narrative elements to establish a clear, consistent and easily recognizable identity for Asia–Africa BlueTech Superhighway (AABS). They include information on using AABS and partner logos, and standard text to describe AABS and acknowledge partners in all communications materials.

This document incorporates guidelines from the donor, UK International Development. The full guidelines can be found here for further review and compliance: [Branding guidance for Official Development Assistance \(ODA\) funded programmes of the UK government](#).

For any questions on the brand guidelines, please contact Sarah Fernandes: [s.fernandes@cgiar.org](mailto:s.fernandes@cgiar.org)

## Logos and co-branding

The UK International Development logo, and WorldFish and CGIAR logos should be included on all materials produced by AABS (e.g. presentations, brochures, briefs, factsheets, videos and freezer equipment). Any partner logos should be included at a consistent size and in alignment with the core logos on the front or back cover. These logos should not be used on every day stationery such as business cards, office signage and equipment, vehicles not exclusively used for AABS and staff clothing.

Any partners must check the use of AABS logos on any new product to ensure compliance with the AABS Communications Lead, Sarah Fernandes: [s.fernandes@cgiar.org](mailto:s.fernandes@cgiar.org)

### Example logo placement

#### Funded by

#### Implemented by

#### In partnership with

**Please note that no sub-branding is allowed:** partners should not create a sub-identity for their share of activities under AABS. If there is a need to create a branded campaign or initiative funded under AABS, please contact Sarah Fernandes: [s.fernandes@cgiar.org](mailto:s.fernandes@cgiar.org)

## UK International Development logo

The UK International Development logo should always have a border of clear space to ensure it stands out. This is also known as the exclusion zone; its width is determined by the width of the letter 'D'. Nothing, including the edge of a page, should fall within the exclusion zone. The logo should ideally be placed on a white background.

## WorldFish and CGIAR logos

The WorldFish and CGIAR logos should always be placed together on materials, either in full color or white. The logos must not be placed on a background image or background text. The white logos can only be used on a WorldFish blue background. You can download the logos [here](#).

## Fonts

The fonts are an integral part of the visual identity. AABS uses two fonts from WorldFish branding. Publications use a design-centric font called Myriad Pro. This typeface has a strong font family providing professionals with light, regular, semi-bold and bold variants. Please note, Myriad Pro is not automatically loaded on some devices. Devices without Myriad Pro have trouble displaying email, Word or PowerPoint documents that include this typeface.

Arial is the AABS font for digital interfaces (e.g. email, website) and desktop publishing (such as Microsoft Office). This is a simple and widely available typeface that minimizes the font load issues that can arise with Myriad Pro.

**Arial is to be used for all documents and emails that appear in the public domain. Myriad Pro is to be used for all designed publications and products.**

<h3>Arial</h3> <p>Arial is a widely available sans-serif typeface and computer font packaged with Microsoft Windows, other Microsoft applications, Apple Mac OS and many PostScript computer printers.</p> <p>Regular Type A B C D E F G H I J K L M N O P Q R S T U V W X Y Z a b c d e f g h i j k l m n o p q r s t u v w x y z 1 2 3 4 5 6 7 8 9 0 \$ % &amp; ( , . : ; # ! ? )</p> <p>Bold Type A B C D E F G H I J K L M N O P Q R S T U V W X Y Z a b c d e f g h i j k l m n o p q r s t u v w x y z 1 2 3 4 5 6 7 8 9 0 \$ % &amp; ( , . : ; # ! ? )</p>	<h3>Myriad Pro</h3> <p>Myriad is a humanist sans-serif typeface designed by Robert Slimbach and Carol Twombly. ---	---

## Colors

The primary, secondary and accent colors for AABS come from WorldFish branding. The exact color codes noted below should be used to generate colors on all materials. The primary dark blue can be used for headings, the secondary blue or green for subheadings, and the accent yellow and purple for graphic elements. The accent yellow should not be used for text as the contrast is too low. If additional colors are needed (e.g. for illustrations, charts), please refer to the full WorldFish brand guidelines.

### Primary

C99 M81 Y20 K5  
R26 G73 B133  
HEX 1A4985  
PANTONE 7687 C

### Secondary

HEX 763F98  
PANTONE 7662 C

## Visual assets

### Imagery

Photography and imagery are core to the WorldFish and AABS brands. Images should represent small-scale aquatic food systems, seawater farming and coastal fisheries, with a focus on data, technology, management and sustainability. Any images used should have been taken in one of the AABS project countries: Bangladesh, Ghana, Indonesia, Kenya, Mozambique, Nigeria, the Philippines, Solomon Islands, Tanzania or Vietnam. Imagery should represent subjects positively, highlight solutions and knowledge sharing, as well as community empowerment, especially for women and youth.

Images could show:

- Dynamic images of the fishworkers and community partners with whom AABS works
- Images of freshwater or coastal fishing and farming projects
- Images of research in action
- Close-up imagery of technologies, people and products fishworkers catch or farm
- Participant engagement at capacity development and knowledge exchange workshops (avoid posed group photos)

Images of human subjects should be close-ups rather than long shots. Images can be cropped and adjusted for color, light or focus to increase their impact.

Only high-resolution images (300 dpi for printed material, and 72 dpi and above for digital) should be used.

Photos used must be appropriately captioned and credited, noting the location and the people in them. All photos taken must be with the consent of the subject(s) in the photo.

See WorldFish Flickr for examples at [www.flickr.com/theworldfishcenter](http://www.flickr.com/theworldfishcenter)

Photos will be curated in the AABS photo library on Flickr. For sharing photos and more information, contact: Sam Shng Shng at [s.sam@cgiar.org](mailto:s.sam@cgiar.org)

Example images

## Nodes network graphic and yellow accent

The following nodes network wallpapers can be used on AABS branded materials, for example, where a dark background is needed to place text over the top or where a photograph would not be appropriate. All AABS branded materials must include a yellow accent of some kind, either as a straight or diagonal line or text.

## Diagonal shape

To provide a distinct identity to AABS products, AABS uses a diagonal shape cutout for photos with a one-sided yellow edge to frame the photo. This style for imagery can be used in AABS posters, banners, presentations, briefs and other materials. The diagonal shape cutout for photos uses rounded corners, not pointed corners. You can find the identity assets to use [here](#).

---

## Narrative identity

### AABS tagline

Delivering a triple win for nature, people and climate

### Longer tagline

Leveraging South–South collaboration to deliver a triple win for nature, people and climate

### AABS boilerplate text

#### Long version

Asia–Africa BlueTech Superhighway (AABS) harnesses South–South collaboration to assess, adapt and scale evidence-based innovations and models for delivering nature-positive impact through aquatic food systems. Implemented by WorldFish in collaboration with a host of partners, AABS aims to transform the livelihoods of coastal communities across Asian and African countries, particularly for women and youth, and help restore marine and coastal ecosystems by developing sustainable and resilient aquatic food systems. Funded by UK International Development under the Blue Planet Fund, AABS is being implemented in two phases over the course of seven years (2023–2030).

#### Short version

Asia–Africa BlueTech Superhighway (AABS) is a seven-year project (2023–2030) implemented by WorldFish with a host of partners to transform aquatic food systems in Asia and Africa. Funded by UK International Development under the Blue Planet Fund, AABS aims to leverage South–South collaboration to deliver a triple win for nature, people and climate.

## Language

Use US English spelling (no serial comma) across all AABS materials, following the WorldFish style guide. The style guide helps staff, writers and editors follow a consistent and straightforward style across all AABS publications. WorldFish aims to write in clear, concise language, free from jargon and scientific rhetoric. As a scientific organization, it aims to make scientific concepts understandable and encourages the use of plain English.

## Use of project name

Please follow the guidelines below when referring to AABS in all communications materials:

- Spell out the full project name with the acronym in brackets the first time the project is mentioned: Asia–Africa BlueTech Superhighway (AABS)
- Use an ‘en’ dash to separate Asia and Africa in the full name: “Asia–Africa” not “Asia-Africa”
- Use the AABS acronym after the first mention of the project name in full
- When using the project acronym, refer to the project as “AABS” and not “the AABS” or “the AABS project”

Correct use:

“AABS is being implemented in Tanzania to ...”

Incorrect use:

“AABS project is being implemented in Tanzania to ...”

“The AABS project is being implemented in Tanzania to ...”

## Donor and partner acknowledgments

All published materials, including peer-reviewed and non-peer-reviewed publications, reports, journal articles, working papers, briefs and other communications materials and website pages should display one of the following acknowledgements and disclaimer at a minimum.

### Funding statement and disclaimer

This funding statement should be used as an acknowledgment in all reports, publications and other communications materials.

Implementation	Statement
Implemented by WorldFish and supported by collaborating partners	This work was undertaken as part of Asia–Africa BlueTech Superhighway (AABS) led by WorldFish in collaboration with partners <i>[list contributing organizations in alphabetical order]</i> . Funding support for this project was provided by UK International Development from the UK government; however, the views expressed do not necessarily reflect the UK government’s official policies.
Implemented by WorldFish but led by a partner, with additional support from collaborating partners	This work was undertaken as part of Asia–Africa BlueTech Superhighway (AABS) led by WorldFish and implemented by <i>[name implementing organization]</i> . Additional support was provided by <i>[add names of other partners in in alphabetical order]</i> . Funding support for this project was provided by UK International Development from the UK government; however, the views expressed do not necessarily reflect the UK government’s official policies.

## Asia–Africa BlueTech Superhighway

Leveraging South–South collaboration to deliver a triple win for nature, people and climate

**Speaker Name**  
**Date of presentation**

## Delivering a triple win for nature, people and climate

**AABS aims to:**

- Improve food and nutrition security.
- Create increased employment and income opportunities using nature-based solutions.
- Restore and sustainably manage marine and coastal resources to mitigate and help coastal communities adapt to climate change.

## Expected AABS outcomes

Impact Area	Target
Poverty reduction, livelihoods and jobs	An increase in aquatic food production of up to 500,000 metric tons in target countries, sustainably increasing incomes of 300,000 people by 2030.
Gender equality, youth and social inclusion	A total of approximately 150,000 women benefiting from a significant impact by 2030.
Environmental health and biodiversity	Up to 1.4 million hectares of the coastal zone brought under sustainable management.

## WP3: Climate-Smart Technologies for Reducing Food Loss and Waste

Scaling affordable and accessible climate-smart food preservation, processing and storage technologies to reduce aquatic food loss and waste

**Target countries**  
Kenya, Mozambique and Tanzania

**Lead**  
Aditya Parmar, WorldFish
